Member of The North West Editors Guild

### **Profile**

With experience across a wide range of programming over 20 years in the *Broadcast, Commercial and Digital media industry* I have experience in *Documentaries* of varying styles from observational to historical, *entertainment and cultural* including *Children's programming and live events in sport*.

Formats have included single camera, Multicam, studio feeds live ob feeds using many video formats and styles utilising broadcast standards from a wide range of broadcasters.

Working for the Farm from 2011- 2019 and being based at MediacityUK and providing work solely for the BBC, I was expected to work on any and all varieties of programming from one day to the next and in different states of completion and expectation. All to strict standards both technical and editorial. In the time I was there I worked in the newly built MediacityUK and took on the pressures of first broadcast and delivery on numerous programmes in new work flows, adopted the ever growing need for social media requests and interaction, provided internal films for the BBC and provided support when necessary for productions in all departments when need called upon.

I can turn my hand to quick turnaround short form workflows or long form workflows and the ability to work closely with producers and alone to a brief if required.

Now freelance I continue to work for the BBC as well another clients in the broadcast, Digital and commercial sectors.

I have my own home setup running premiere pro where I have been providing content numerous clients remotely in the U.K and across the globe.
