davecromptontv@googlemail.com

I've worked for almost 30 years in broadcast TV, starting in world format standard tape conversion, swiftly joining Avid UK in London as a support editor based in Soho.

I then became the Northern based lead support editor serving the entire north including Northern Ireland and the whole of Scotland, installing and training hundreds of broadcast editors from every kind of production, film, drama, factual, sport, entertainment and music videos.

I left Avid in my early 20's and have been freelance for almost 30 years now with barely a break.

Having worked for ITV, BBC1, BBC2, BBC3, CH4, CH5, Sky, MTV and recently NETFLIX.

I have been working remotely for the past few years, based within a few miles of MediaCityUK.

I have generally been kept on long term productions over the last three decades and have a passion for the finer detail in both picture, music and sound finessing.

I care passionately about everything I work on and thoroughly enjoy bringing something extra.

I've cut everything from Bob the Builder to Corrie and hope to work on your next project.

Credit Roll
